TACTICAL FLEX, INC.

CUSTOMER SUCCESS STORIES: SEE WHY CUSTOMERS CHOOSE AANVAL

A LEADING ONLINE RETAILER

Customer Success Stories: See Why Customers Choose Aanval

Customer Snapshot: A Leading Online Retailer

Industry: A publicly traded home improvement retailer with 200-500 employees. Company primarily conducts business through e-commerce. All security initiatives are managed in-house.

Customer Need: IT department was searching for a robust IDS utilizing Snort to manage and monitor their growing business and network infrastructure. Initially the company was using a standard Snort interface.

Customer Evaluation of Aanval SAS: Aanval was the primary product evaluated during the solution search process. The company's Information Security Manager evaluated Aanval for the following security use cases:

•Log Monitoring and Network Traffic Analysis

•Packet Management

•Anomaly Detection

•PCI Compliance

Aanval SAS met all of the evaluation criteria and found Aanval easy to use, configure and install. Company has purchased the Aanval SAS commercial license is now using Aanval as their stand alone IDS.

Aanval SAS Has Helped with the Following:

•Improve Operational Efficiency. Helped streamline the IT process of monitoring activities, analyzing and correlating event data, delivering security alerts, and

investigating security incidents.

•Meet PCI Compliance Initiatives. The Payment Card Industry Data Security Standard (PCI DSS) requires that all retailers and e-commerce sites that process, store, or transmit credit card information maintain a secure environment.

•Reduce False Positives

•Provide Needed Situational Awareness

•Improve Security by Accelerating Detection of Anomalies

The Top Business Benefits of Aanval SAS:

•Event Management/Collection

•False Positive Protection

•PCI Compliance

•Affordable Pricing

•Built-in Automated Offensive Tools That Utilizes Nmap. Includes Network Host Scanning, Rogue Host Dettection and Offensive Reconnaissance
